DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 are, drawn to an actuator, classified in class 335, subclass 229.
- II. Claim 18, drawn to a method of manufacturing an actuator, classified in class 29, subclass 602.1.
- III. Claim 19, drawn to a circuit breaker, classified in class 335, subclass 167.

The inventions are distinct, each from the other because of the following reasons:

Inventions III and [I-II] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a circuit breaker not using the actuator of invention I or method of invention II; invention I has separate utility such as an actuator not using the method of invention II or used in the circuit breaker of invention III; invention II has separate utility such as a method not using the actuator of invention I or the circuit breaker of invention III. See MPEP § 806.05(d).

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the actuator can be made by using different stamping/punching method.

Art Unit: 2832

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Embodiment 1: figures 1A-7;
- Embodiment 2: figures 8A-8B;
- Embodiment 3: figures 9A-9B;
- Embodiment 4: figures 10A-10B;
- Embodiment 5: figures 11-16B;
- Embodiment 6 : figure 17;
- Embodiment 7: figures 18-19;
- Embodiment 8: figures 20A-20F;
- Embodiment 9 : figures 21A-23;
- Embodiment 10: figures 24A-26; and
- Embodiment 11: figures 27A-27B.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2832

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
